GO BP enrichment of DEG sets
glycosylation
glycoprotein biosynthetic process
protein glycosylation
macromolecule glycosylation
anatomical structure morphogenesis
animal organ morphogenesis
animal organ development
cellular response to endogenous stimulus
cellular response to organonitrogen compound
response to endogenous stimulus
'de novo' post−translational protein folding
chaperone cofactor−dependent protein refolding
'de novo' protein folding
cellular response to topologically incorrect protein
response to topologically incorrect protein
chaperone−mediated protein folding
