Key GSEA terms: primary analysis vs full−cohort checks
neuron differentiation
glycosylation
cellular lipid metabolic process
cell adhesion
anatomical structure morphogenesis
translation
ribosome biogenesis
protein folding
cellular respiration
cell migration
cell adhesion
ED
EEM
Primary (same length)
Primary + disc adj.
Sex−matched (males)
Full cohort
Full cohort + disc adj.
Primary (same length)
Sex−matched (males)
Full cohort
FDR < 0.05
